

The Research Summary consists of two elements: (1) your Research Journals; and (2) a summation and reflection on research you have undertaken throughout the course, as well as any comments you would like to make to the instructor regarding the course (readings, requirements, the impact of the research process on your learning and understanding, his effectiveness of teaching/conveying information, whether and what you learned during the course, and any other comments, criticisms, or concerns that you have). You will be graded on the thoroughness of your research entries, and the quality of your summation. You will not be graded on the comments regarding the instructor or the course.
