

The Preliminary Bibliography is your opportunity to begin the process of identifying relevant scholarly literature that is pertinent and relevant to your research project. For this assignment, you must submit a list of at least 15 scholarly sources that you plan to use in your research project. These sources may NOT include the following:

1. Newspaper, magazine or other journalistic writing
2. Websites or other materials designed and produced for publication online (this category does not include electronic journals, e-books, or other scholarly materials)
3. Fiction, novels, graphic novels, or other non-scholarly
4. Readings from class
5. Unpublished materials
6. Non-peer-reviewed source material

If you have questions about a particular source, ask. For the final project, you will be allowed to use online materials, journalistic materials, and so on, but for the Preliminary Bib, it is very important to establish a baseline of relevant, pertinent scientific and scholarly sources from which to begin.

Each student should submit her/his own Preliminary Bibliography. You may collaborate with your research partner in locating and sharing sources, but I want a Preliminary Bib from each student.
